DETAILED ACTION

Election/Restrictions

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Species I directed toward Figure 14, Species II directed toward Figure 15, Species III directed toward Figure 16, Species IV directed toward Figure 17, Species V directed toward Figure 18, Species VI directed toward Figure 19, Species VII directed toward Figure 20 and Species VIII directed toward Figure 21, Species VIV directed toward Figure.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

Species I claims 1-4, 9, 12, 13, 14, 15, 16, 21-24.

Species II claims 1-3, 5, 12, 13, 14, 15, 16, 21-24.

Species III claims 1-3, 8, 11, 12, 13, 14, 15, 16, 21-24.

Species IV claims 1-3, 6, 12, 13, 14, 15, 16, 21-24.

Species V claims 1-3, 12, 13, 14, 15, 16, 21-24.

Art Unit: 2817

Species VI claims 1-3, 12, 13, 14, 15, 16, 18, 19, 21-24.

Species VII claims 1-3, 10, 12, 13, 14, 15, 16, 17, 21-24.

Species VIII claims 1-3, 7, 12, 13, 14, 15, 16, 20, 21-24.

Species VIV claims 1-3.

The following claim(s) are generic: Claims 1 is considered to be generic.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The various species includes different means for use with the different pilot signals that are mutually exclusive from each other.

This new requirement supercedes the prious requirement and addes the species to Figure 13 which was thought to first be generic but it is not for it is directed toward the single tone embodiment and has a "800" section that the other species.
